News

Forerunner Managed Services

Forerunner Managed Services simplifies the delivery of IT services saving you time, money, and ensuring your systems are secure.

How can FMS look after you?

Remote Assistance

No matter where you are in the world, providing you are connected to the internet, you are only a click away from assistance.

Network Monitoring

Forerunner can setup network monitoring so that we receive an alert if a server or a computer goes down or a specific piece of hardware incurs a problem.

Software Installation

Forerunner can also automate certain types of software installations and select the computer name and software, followed by selecting deploy. Certain tasks including defragmentation and virus scans can be automated and scheduled at specific times, day or night.

Other benefits of Forerunner Managed Services includes reporting, remote audits, patch management, full system backup for data recovery and more.

For more information, contact us on 8269 5260
