### Windows 7

#### Top 10 Reasons to Upgrade

1. **Get quicker access to everything on your computer:** use Pin and Jump Lists to keep the programs and files you use the most right at your fingertips.
2. **Manage open windows more easily:** resize and arrange windows simply by dragging their borders to the edge of your screen.
3. **Quickly find what you're looking for:** use Windows Search to find a specific file, program or email in a few seconds.
4. **Share files and printers among multiple PCs:** from one Windows 7 based PC to another, you can share files, music, photos and even printers across your home network.
5. **Stay entertained effortlessly:** with Windows Media Center you get one place to enjoy your photos and music, watch and record live TV and watch free internet TV.
6. **Easily create and share movies:** create great looking movies and slideshows and share them on YouTube in minutes.
7. **Connect to networks easily:** view and connect to any available wireless network in as few as three clicks.
8. **Do more and wait less:** improvements that can accelerate sleep and resume, and make your PC more responsive help you get more done.
9. **Don't leave programs behind:** run many Windows XP productivity programs in Windows XP Mode.
10. **Offers your PC better protection:** help keep your PC, your information and your family safe.
