### Microsoft Office 2010

Microsoft Office 2010 has been released and Microsoft say it “offers flexible and powerful new ways to deliver your best work—at the office, at home, or at school.

Create standout reports and presentations with tools that help you capture your ideas more creatively. Stay connected to your projects, even when you're away from your computer, with access to Office files via Web browser or Windows phone.<sup>1</sup> Work efficiently with others by sharing, editing, and reviewing files at the same time—even across geographies and time zones.

With Office 2010, you're in control, getting things done and producing amazing results however and wherever you work best.”

Microsoft's Top 10 reasons to try Office 2010 include (in short):

1. Express your ideas more visually
2. Accomplish more when working together
3. Enjoy the familiar Office experience from more locations
4. Stay connected to your business and social networks (with Outlook 2010)
5. Get your message out instantly (with PowerPoint 2010)
6. Create powerful data insights (with Excel 2010)
7. Manage large volumes of e-mail with ease (with Outlook 2010)
8. Deliver compelling presentations (with PowerPoint 2010)
9. Store and track all of your ideas in one place (with OneNote 2010)
10. Work your way, faster and more easily
